Objective

A results-oriented Data Scientist with a strong foundation in Machine Learning, statistical analysis, and end-to-end project development. Proficient in Python, SQL, and libraries like Scikit-learn and TensorFlow. Seeking to leverage analytical skills to build scalable solutions and derive actionable insights from complex datasets.

Education

Poornima University — Jaipur
B.Tech in Computer Science — 2023–2027
- **Specialization**: Artificial Intelligence and Data Science.
- **Thesis**: "Real-time Object Detection on Mobile Devices".

Skills

Programming Languages: Python, C, SQL, JavaScript.
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PyTorch, TensorFlow, React.
Tools Platforms: Jupyter, VS Code, Google Colab, Git, GitHub, Vite.
Concepts: Supervised Unsupervised ML, Clustering, Classification, CNNs, Time Series Analysis

Projects

Multi-Label Chest X-Ray Classification using CNNs:
- GitHub: https://github.com/Harshnaruka01/multilabel-Classification-using-CNN-on-X-rays
- Tech: Python, PyTorch, Scikit-learn, OpenCV, Matplotlib.
- Developed a sophisticated deep learning model in PyTorch to automatically detect 14 different pathologies from chest X-ray images.
- Engineered a custom CNN, training it on a massive dataset of 112,000+ images to deliver a high-impact clinical support proof-of-concept

Sales Forecasting using Time Series Analysis:
- GitHub: https://github.com/Harshnaruka01/Sales-Forecasting-using-Time-Series-Analysis
- Tech: Python, Pandas, Statsmodels (ARIMA), Scikit-learn.
- Engineered and validated multiple forecasting models, including ARIMA and Seasonal ARIMA (SARIMA), to identify the best-performing algorithm.
- Achieved a forecast accuracy of 94% and presented actionable insights through visualizations to guide data-driven decisions.

Customer Churn Prediction Model:
- GitHub: https://github.com/Harshnaruka01/customer_churn_prediction
- Tech: Python, Pandas, Scikit-learn (Logistic Regression, Random Forest).
- Performed exploratory data analysis (EDA) and feature engineering to identify key predictors of churn
- Developed a Random Forest classifier to predict customer churn, achieving an F1-Score of 0.88 and enabling proactive customer retention

Certifications

- MongoDB Certified Developer Associate, **MongoDB University**
- Oracle Database SQL Certified Associate, **Oracle**
- Meta Front-End Developer Professional Certificate, **Coursera**
